

Pontoon Installation

Designed to move with the tides, pontoons are increasingly becoming the structure of choice over permanently fixed jetties. The council at this bay in Tasmania made the decision that a pontoon needed to be installed. This pontoon would be widely used by the surrounding yacht and canoe clubs, as well as the local community for their water activities.

Treadwell was engaged to supply the material as well as assist on design matters to build and install this pontoon.

Project Challenges

- Materials for this floating structure had to be lightweight to maintain buoyancy.
- Structure would be subject to wave loading and needed to be resilient in such conditions.
- There were concerns on deterioration and corrosion of the material as it would be permanently exposed to the outdoor marine environment.

PROJECT INFORMATION

Project Category:	Recreational Public Infrastructure
Scope of Work:	Supply of FRP products and fastening system
Treadwell Products:	GratEX® FRP Mini Mesh grating EX-Series® Stormchief® Wave Action Fastening system

Treadwell Solution:

1 GratEX® FRP Mini Mesh grating is constructed with specially formulated resin to address the concerns of corrosion and deterioration, ensuring long design life.

2 GratEX® grating panels offer anti-slip properties for enhanced safety for the user.

3 The EX-Series® Stormchief® system is the optimal maritime grating fixing system to manage wave loading. Installation is easily carried out from the top surface of the grating.

4 FRP is simply fabricated and modified on site. This means there is no need for any hot works permit.

5 Being lightweight and easy to install, FRP is very manageable during construction.

6 Given the nature of FRP, any system utilising it is virtually maintenance free, keeping maintenance costs to a minimum.

OFFICES

ABOUT TREADWELL

At Treadwell Group, our core business divisions have been developed utilising the latest fibreglass reinforced plastic (FRP) technology. With constant innovation and evolution of our offerings, we grow in competence with each experience in delivering unparalleled solutions to a diversified index of industries which include the water and wastewater, mining, oil and gas, public infrastructure, marine sectors. The progression of our products has been focused on ensuring extended design life in varied applications, enabling us to support our continuing commitment to satisfy and add value to our client's endeavours.
